ATTACHMENT A

Please consider this letter my Petition for Reconsideration. I hope that I have managed to meet the appropriate timeline for Reconsideration.

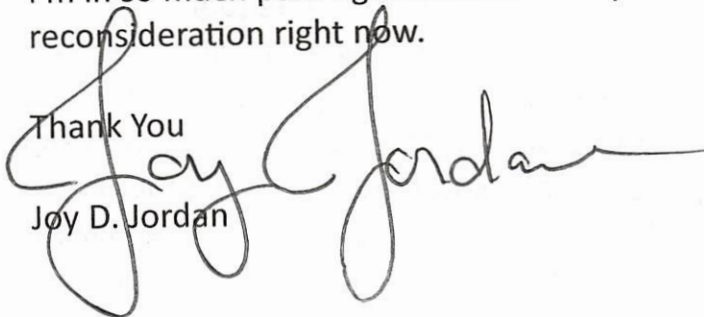

I had fallen at the end of November 2023 and in trying to break my fall and catch myself, I landed on top of my Left arm, hand, and fingers. I have limited use of my left arm and very little strength so needless to say my arm didn't help. I went to the doctor thinking I must've broken my fingers as they were very swollen and hurting so much. I was in referred to the orthopedic department to which they put a cast on my hand/arm. When I went back from my follow up, they did another x-ray and concluded that both of my fingers were dislocated so bad that it required surgery. My surgery was done on January 29th of 2024. My ring finger and my pinky finger had to be cut open and pins put in them to set them back in place. I was told that the dystonia has made my bones brittle and susceptible to breaking. On top of this injury, having the cast on my left arm prior to my surgery prevented me from receiving the Botox injections that I receive on schedule of every three months. The Botox injections is the treatment for dystonia. my dystonia. The Botox relaxes the contractions, spasms, and muscles in my left arm. Not receiving my scheduled Botox is exacerbating my pain from my current injury due to having pins in my fingers to align my bones along with a cast so there's not any movement and contractions and spasms are very painful. I do not know when I will be able to receive the Botox because I still have pins and sutures and a cast on my left arm.

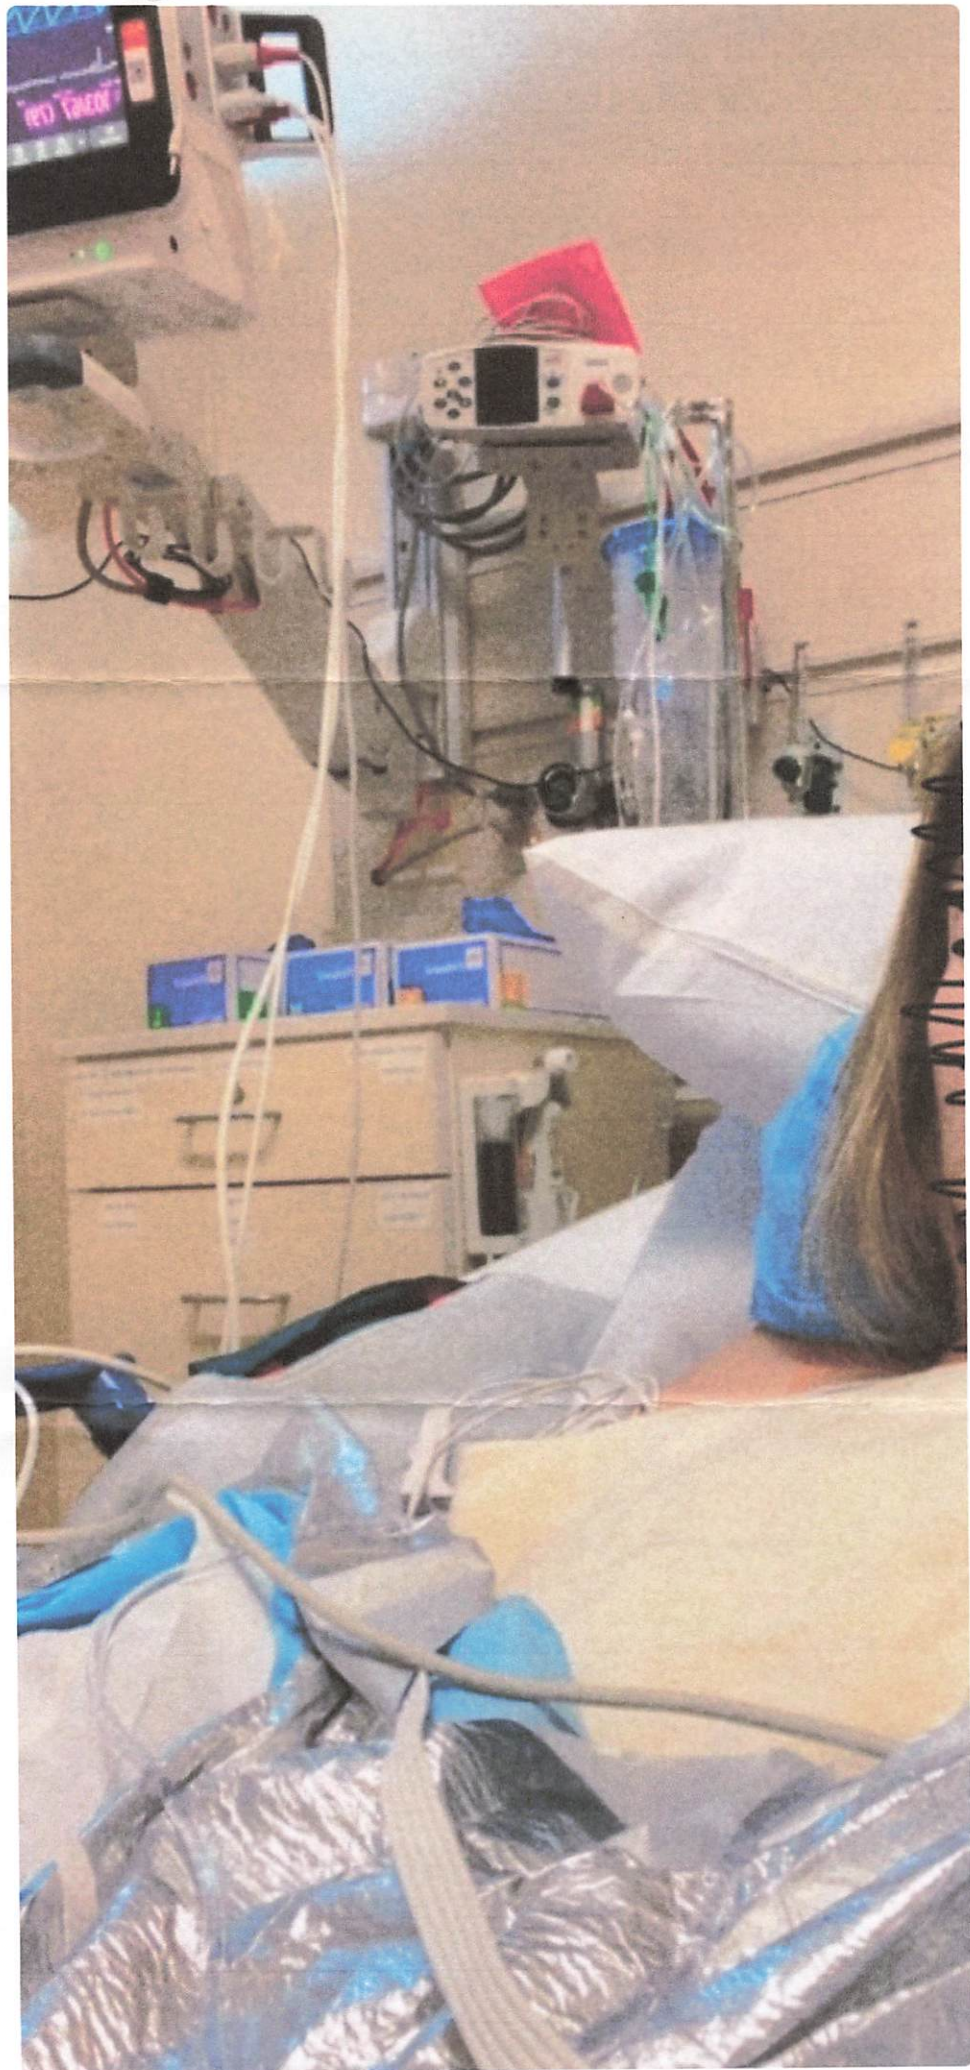

I'm telling you all this information because I'm in no position to be able to properly big Cal Pers for a reconsideration. There are no other options for me but to keep fighting for myself as I cannot work. I'm asking Cal Pers to please give me an extension to be able to help myself.

I'm in so much pain right that I cannot put any time or effort into begging for reconsideration right now.

Thank You
